

# Legal Ops That Thinks for Itself

AI and Legal together forever

## Why Now? The Legal Ops AI Inflection Point

Real challenges legal ops teams face today:

83%

of legal departments expect workload to increase in the next 12 months

63%

of legal departments say they don't have the resources to keep up

72%

of in-house lawyers report burnout from repetitive tasks

AI won't replace your team. But it can take the administrative burden off their plates, so they can focus on what matters.

## Not all AI is built for legal. Here's how to spot the difference.

There's a lot of AI hype out there. Some tools promise everything. Others do nothing. Legal teams need agentic AI solutions that produce real results. On your terms.

AI That Works

- ✓ Purpose-built for legal ops
- ✓ Real, explainable work product
- ✓ Native audit trails
- ✓ Customizable workflows
- ✓ Operates in your systems

AI Hype

- ✗ Generic chatbot wrappers
- ✗ Black box recommendations
- ✗ No accountability
- ✗ Rigid templates
- ✗ Requires platform change

## The Real World Impact of AI-Native Legal Ops

**Accuracy**  
AI is just as good (or even better) than people at spotting legal issues.

**Cost**  
AI review is 99.97% cheaper than traditional methods.

**Speed**  
AI reviews contracts up to 77x faster than humans.

**Strategic Vision**

**Evolving Roles**  
Junior Lawyers will increasingly shift toward high-value, strategic legal work.

**Early Mover Advantage**  
Legal departments that integrate LLMs early will gain a significant competitive edge.

## Unity is Legal's New Standard

No two legal departments are the same, so why settle for a one-size-fits-all solution? Unity is legal's new standard. Your terms. Your legal Workflow. Your partner to scale.

What you can accomplish with an AI-native platform built to flex around your team:

- Cut invoice review time → Spend Agent
- Scale vendor strategy → Counsel Match
- Automate workflows → Agent Studio
