

The AI-Native Legal Solution for Seamless, End-to-End Legal Operations

 AI Agent Studio

 CLM

 ELM

 Workflow App Studio

Overview

Onit Unity is an AI-native legal operations solution that empowers legal teams with automation, analytics, and strategic control over legal spend, compliance, contracts, and risk. By unifying Enterprise Legal Management (ELM), Contract Lifecycle Management (CLM), and other critical legal applications into a seamless, configurable platform, Onit Unity enhances decision-making, improves efficiency, and aligns legal operations with business objectives.

One AI-first solution connecting every aspect of legal work.

- Seamlessly integrates **Matter, Contract, Spend, Compliance Management** and more onto a single, intelligent platform.
- **Eliminates fragmented systems** with a cohesive, AI-first workflow that automates routine tasks and improves decision-making.
- **Designed for legal teams that need efficiency, visibility, and control** — from contract negotiations to outside counsel spend.

Why Onit Unity?

Onit Unity isn't just AI-enhanced — it's AI-native, with automation and intelligence embedded at its core.

Our customers benefit from:

- ✓ **Trusted by 3,000+ Customers** – Legal teams of all sizes rely on Onit for workflow automation that goes far beyond ELM and CLM alone.
- ✓ **Customer-First Service & Support** – Dedicated support teams and a proven track record of high customer satisfaction ensure a smooth experience from implementation to long-term success.
- ✓ **Seamless Enterprise Integrations** – Deep, advanced system integrations with ERP, CRM, and legal solutions enable a connected, frictionless legal workflow.

Trusted

Trusted by over 3,000 customers and supported by 15 global partners, Onit delivers innovative Legal Operations solutions that harness the power of data and automation to help legal teams achieve strategic outcomes.

Key Benefits

- ✓ **One Unified Legal Solution** – Eliminate silos by consolidating ELM, CLM, and other legal applications in a single, AI-native ecosystem.
- ✓ **AI-First Efficiency** – Unity is **AI-first** — powering **predictive insights, automation, and decision-making** across all legal workflows.
- ✓ **Scalability for Every Legal Team** – Start fast, scale seamlessly with native **AI automation embedded in your workflow**.
- ✓ **Seamless, End-to-End Legal Operations** – A single, **fully connected solution** that integrates **Matter, Contract, Spend, Compliance** and more - eliminating fragmented tools and disconnected workflows.
- ✓ **Data-Driven Decision Making** – Real-time dashboards provide full visibility into legal operations, automating decisions and proactively identifying risks.
- ✓ **A Modern, Intuitive UI** – Legal teams can operate with greater ease, efficiency, and confidence.

AI that works for legal — automating, predicting, and optimizing every workflow.

- ✓ Conversational AI unlocks real-time legal insights — from spend tracking to contract risk analysis.
- ✓ AI Agents automate routine legal work, including spend management, contract reviews, and matter tracking.
- ✓ Predictive analytics anticipate risks, recommend actions, and streamline decision-making across all legal operations.
