

OnitX Matter Management

Collaborative Matter Engagement

Get the broad clarity your matter portfolio needs. **OnitX Matter Management** helps engage your entire legal team through powerful collaboration and workflow capabilities, delivering visibility and insight into your matters throughout their lifecycle.

The Challenge

An overwhelming number of matters can easily lead to confusion, frustration, and a lack of trust throughout the organization.

Clarity, Collaboration, and Configurability

To ensure all matters are properly addressed, Legal needs a solution that provides clarity to the workflow, encourages collaboration throughout the organization, and allows for the configurability to suit its needs.

Finding The Right People

Legal departments need to make sure that the right work goes to the right person with the right expertise — and that all of the work of the law department is represented.

The Solution

OnitX Matter Management empowers your entire organization to work together on legal matter, share knowledge, and drive results in a highly collaborative fashion.

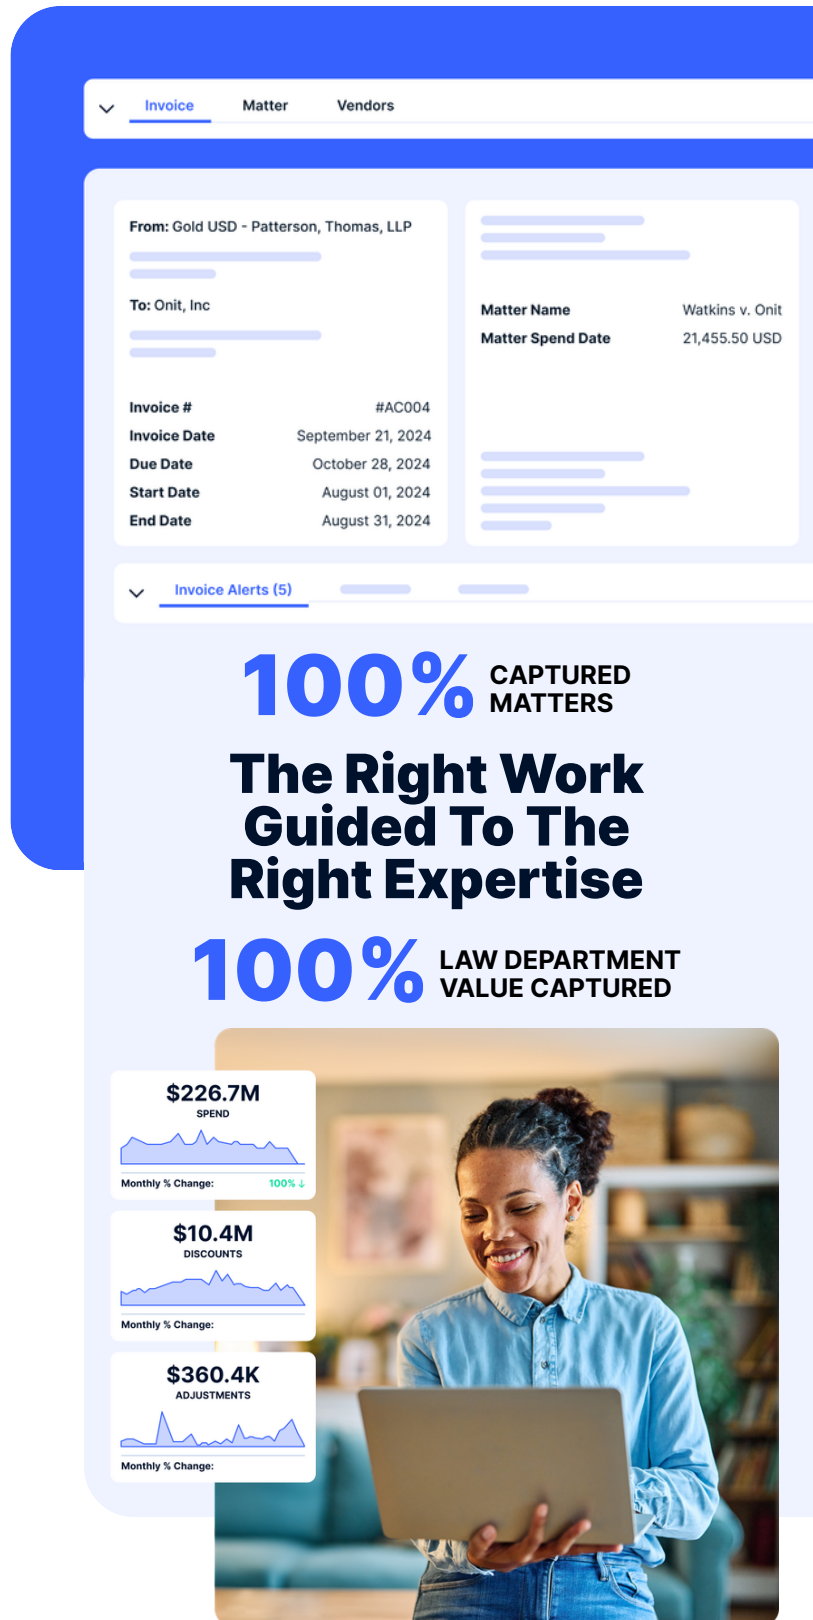

Tracking and Insights

Access a complete legal matter management repository for the entire enterprise — and the insights needed to monitor matters throughout their entire lifecycle.

Built For You and Where You Work

Integrate with Microsoft Office, Google, and other third-party solutions so you can create the custom data forms your legal team needs to succeed.

How Matter Management Helps

OnitX Matter Management provides a configurable and user-friendly resource that adapts to the needs of innovative in-house legal departments.

Track What Matters

Get a complete legal matter management repository to organize all matter-related information.

Meeting You Where You Work

Deep integration with Microsoft Office, Google and other third-party solutions allows Onit to bring your work to where you already carry it out.

Built For Your Needs

Create custom intake and data forms with the capability to support context-sensitive and conditional data capture.

Streamlined Processes

Get immediate access to critical matter, finance, and performance metrics through simple information collection, management, and workflow.

Real-Time Insights

Monitor all your internal and external matters throughout their lifecycle through real-time data and dashboards.

Organization-Wide Solution

Ideal for lawyers and legal staff but built for an array of light users across the enterprise.

Configured System of Record

Create a highly secure "system of record" for all types of sensitive matter information.
